DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on March 21, 2006 has been entered.

Allowable Subject Matter

2. Claims 1-35 and 110-183 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter: a search of the prior art failed to disclose or reasonably suggest a memory cell including a storage capacitor coupled to one of a source and drain of a transistor; a floating gate, tunnel gate oxide, and control gate; a metal oxide insulator separating the control gate from the floating gate, wherein the metal oxide has a tunneling barrier height less than the first tunneling barrier height; and the memory cell adapted to operate in a volatile memory mode and a non-volatile memory mode. The remaining claims depend from or otherwise require all the limitations of allowable product claim 1.

Acovic et al. '188 discloses a memory cell including a transistor having source, drain, and channel regions (fig. 1), a floating gate (14) and a control gate (12); and a capacitor coupled to the drain region (fig. 2, 28), but the device

operates in non-volatile mode and the tunnel oxide and control gate oxide are the same material (34).

Lam '417, Noble et al. '083, Yoshii et al. '928 and Eldridge et al. '603 disclose a non-volatile memory cell including source, drain, and channel regions, a floating gate and a control gate, but there is no capacitor coupled to the source or drain region to allow a volatile operation mode.

Kuroda '448, Dias et al. '584 and Guterman et al. '035 disclose memory devices including a DRAM cell and a floating gate cell, but the devices are separate and not part of the same transistor cell.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
